Adverting to Government Order No L 3258-62/Ml 75-41-2 dated 30th October 1941 approving the action of this office in having instructed the Sanitary Engineer to place orders for two high lift and two low lift pumping units at a cost of Rs 31,266/- for the above water works, I have the honour to enclose herewith for the information of Government a copy of letter No 3249 dated 11-3-42 of the Sanitary Engineer addressed to the supplying firm Messrs Mather & Platt, Ltd Bombay, requesting the firm to supply motors of slightly higher H P viz , two 30 H P motors and two 80 H P motors in place of two 25 H P motors and two 72 H P already ordered In a personal talk with me, the Sanitary Engineer said that there will be frequent breakdowns if the motors that have been ordered for are purchased and used In forwarding the letter, the Sanitary Engineer states that he will submit definite proposals on receipt of a reply from the firm as regards the extra cost likely to be incurred in this behalf

I have the honour to be,
Sir,
Your most obedient servant,
Director of Public Health

Letter No 3249 dated 9/11th March 1942 from the Sanitary Engineer Bureau of Sanitary Engineering, Bangalore, to Messrs Mather & Platt, Ltd , Bombay House, 24,Bruce St , Fort, Bombay

---- --

Re Local Indent No 6358 and letter No 11898 dated 27th October 1941 from the Secretary, Stores Purchase Committee, Bangalore, to you regarding Pumping sets for water supply to Chitaldrug Town

---

In inviting your kind reference to the above order, I wish to state that on account of certain changes in the design of the Kathral Project,it has become necessary to have the high lift and low lift pumping sets provided with motors of slightly larger BHP than those mentioned in the above order For the two low lift pumping sets it is desirable to have 30 HP motors in place of the 25 ordered and for the two high lift pumping sets 80 HP motors have to be provided in place of 72 ordered There is no other change in the machinery ordered through the Stores Purchase Committee in the above indent

I wish to request you therefore to kindly arrange to have these larger sized motors coupled on to the pumps

The Secretary, Stores Purchase Committee, Bangalore, is also being addressed in the matter As the matter was urgent a reference has been made to you direct

The favour of an urgent reply in the matter is requested

Memo No 1427 dated 11-3-42 from the Sanitary Engineer, Bangalore, to the Director of Public Health in Mysore, Bangalore

---

Copy of the above is submitted to the Director of Public Health in Mysore, Bangalore, for kind information Definite proposals will be submitted on receipt of a reply in regard to the extra cost that is likely to be incurred Consequent on the supply of higher horse power motors Since the matter was urgent, a reference has been made to the firm The action taken may kindly be approved in the light of the personal talk I had in the matter on the 6th instant

---

Pumps for Chital Drug water supply Your order No SPC 11898/Local Indent No 6358 dated 27-10-1941 - Our reference No 9341-C

We have now received a cabled reply to our air-graph letter of the 10th pril and our works state that they consider higher output motors advisable for the conditions under which you specify the pumps will have to operate They also state that it is quite feasible to offer higher output motors at this stage We therefore give below the extra prices which our works quote for 30 and 90 BHP motors

Low Lift Pumps

1) Two - Dual frequency motors, with Class "A" insulation and 35 deg C rise, exactly as specified under item No 1 of our Estimate No 6 dated 26-6-41 but having an output of 30 BHP complete with suitable oil immersed star delta starter
Rs 845/- EXTRA EACH MOTOR

1190
3 05

High Lift Pumps

2) Two - Dual frequency motors with Class "A" insulation and 35 deg C rise, exactly as specified under item 2 of our Estimate No 6, but having an output of 90 BHP, complete with floor mounting auto-transfer starter as before, but suitable for 90 BHP
Rs 1525/- XTRA EACH MOTOR

Please let us know as quickly as possible whether the extra prices quoted by our works are acceptable to you and whether our works may proceed with the manufacture of the higher output motors You will realise that our works are keeping your order in abeyance pending this information from you

Please note that we have based the above figures on cabled information received from our works, and these figures are, therefore subject to ourworks confirmation

Machinery required for the Kathral Project

SIR

With reference to your letter No L 3305 /M1 75-41-32 dated 24th September 1942 enquiring about the necessity for the purchase of higher power pumps and whether orders have been placed for these, I have the honour to state that orders have been placed with Messrs Mather and Platt Vide Copy of letter No SPC 3475 dated 28th July 1942 of the Secretary, Stores Purchase Committee enclosed herewith

As regards the necessity for higher power motors, I enclose herewith also a copy of Sanitary Engineer's letter No 3596 dated 2nd April 1942 addressed to the Secretary, Stores Purchase Committee, which is self explanatory

I request you to be sogood as to obtain and convey sanction of Government to the purchase

I have the honour to be,
Sir,
Your most obedient servant,

KAJ

Director of Public Health

As regards the improved Class A Type of insulations and temperature rise of 35°C these conditions may be enforced and

Letter No 3596 dated 2nd April 1942 from the Sanitary Engineer Bureau of Sanitary Engineering, Bangalore, to the Secretary, Stores Purchase Committee, Bangalore

---

I am in receipt of your letter No S P C 23655 of 20th March 1942 and also of letter No S P N /NA 9341-G of 13th March 1942 from Messrs Mather and Platt, Bombay in regard to the Local Indent No 6358 - Pump sets for Chitaldrug Town Water Supply and in reply I have the honour to state as follows -

I Low Lift Pumping Sets

(1) The original order was for a 25 H P Motor driven pump delivering 350 gallons per minute against a head of 140 ft This pump is likely to deliver 380 gallons per minute or more against a head of 115 feet due to the changed location of this pump set The absorbed power at pump for this increased discharge is likely to be very nearly 22 5 H P or so and the rated power of 25 in the motor is not regarded as having enough reserve, especially because of the following other contingencies

(2) The raw water to be pumped will be extremely turbid over a large part of the year and density of water higher than that of "the reasonably clear and pure water" mentioned in the Firm's letter quoting for pump sets

(3) The variations in voltage and frequency in the hydro-electric power at this end of its long transmission system will be greater than usual Further from the High tension w ich will be stepped down to 220 volts near the room of the High Lift Motors the low tension of 220 volts is to be conveyed over 2800 ft before it reaches the low lift motor room

(4) The summer conditions of this district are rather trying and if the motor is already overloaded and it is also subjected to above variations then it may not have sufficient reserve power over its rated maximum capacity and may get burnt out or overheated soon

Hence it is thought that a 30 H P motor is better for these duties

II High Lift Pump Sets - The original order is for 72 H P motor driven pump delivering 350 gallons per minute against 450 feet head But the head in actual may not be above 425' The discharge may go to 380 gallons per minute or more and the power absorbed at pump end may go to 67 or 68 H P A 72 H P motor is thought as not having sufficient reserve to take care of the other varying factors mentioned under I which hold here also except th t the water pumped here is clear filtered water It is thus better to have 80 H P motor to prevent overheating and burning out

The extra cost which will have to be borne may be ascertained and intimated

As regards the improved Class A Type of insulations and a temperature rise of 35°C these conditions may be enforced and

Letter No S P C 3475 dated 28th July 1942 from the Secretary, Stores Purchase Committee, Bangalore, to the firm Messrs Matner and Platt Ltd , Bombay

---

Local Indent No 6358

This office order No 11808 dated 27 10 41 for the supply of pumping sets required for Chitaldrug Town Water Supply

---

With reference to your letter No STN/Na dated 18th June 1942 on the above subject, I write to state that the extra prices for the motors of higher capacity as noted hereunder is accepted

Low Lift Pumps

1 Two - Dual frequency motors, with Class 'A' insulation and 35 deg C rise, exactly as specified under item No 1 of your Estimate No 6 dated 26th June 1941 but having an output of 30 BHP complete with suitable oil immersed star delta starter

Rs 845 extra each motor

High Lift Pumps

2 Two - Dual frequency motors with Class 'A' insulation and 35 deg C rise, exactly as specified under item No 2 of your Estimate No 6, but having an output of 90 BHP complete with floor mounting auto-transfer starter as before, but suitable for 90 BHP

Rs 1,525 extra each motor

You may instruct your Principals to proceed with the manufacture of the motors of higher capacity and supply them as early as possible
